

Snow Chains and Trailer From Dave Lee

Did you know that during the snow season, if we have into really bad conditions, the CHP can make you chain the rear axel of your trailer and the rear axel of you truck or car (even if it is 4 wheel drive)? It does not happen often, but I carry a set of wire chains for our 4WD truck and a set of wire chains for the fifth wheel. If you are caught without them, it can be very inconvenient and expensive.
